

# Omaha On-Site Car #2 Takes to the Air

The LCCA 50th Anniversary convention was set to include many surprises and world-class tours. The Omaha Strategic Air Museum was one of those unique tours. And the LCCA worked with Lionel to create a special second On-Site Made-in-America boxcar dedicated to the U.S. Air Force/SAC Headquarters located in Omaha.

Even though the 2020 convention is not to be, members can still buy this very special boxcar with graphics on the sides and the top. And the car is made in the U.S.A. with the American flag on both doors.

The boxcar features die-cast metal sprung trucks, metal frame and plastic body. It is 10 ½ inches long with operating couplers and can handle 0-27 curves.

This special LCCA boxcar is \$99, ready to ship and shipping is free. But only 350 of these unique cars were made, so the limit is one per member. Call the LCCA Business office at (815) 223-0115, go to the LCCA website store at [lionelcollectors.org](http://lionelcollectors.org) or complete and mail in the form on the inside back cover of this issue. But hurry, cars this special sell out fast!
